IN THE CLAIMS:

Please add the following new claim:

[Handwritten: 115] --115. A gas generating composition as defined in claim 114, wherein the release agent comprises graphite, molybdenum sulfide, calcium stearate or boron nitride.--

REMARKS

Applicants respond to the Examiner's paper dated December 21, 1999 by confirming their prior remarks, namely their election of the Group I claims and more particularly the election of gas generating compositions containing a release agent (e.g. claims 85 or 115), at least one complex of a metal ammine (for instance, claims 86-89, 97 102 and 114), and, ultimately, a cobalt nitrate ammine.

Mold release agents described in the specification at page 21, lines 7-8 are now presented in new claim 115. Calcium stearate is an exemplary mold release agent for "election" purposes.
